

Schneider Electric in a nutshell

Schneider Electric is the global specialist in energy management and automation

~ 25 billion euros
Yearly Sales

~ 5% of revenues
devoted to R&D

~ 170,000 people
in more than 100 countries

On 5 diversified end markets

We are a 'Tech' Company

With balanced geographies:

Accounting for 75% of the world
energy consumption:

-  Utilities & infrastructure
-  Industry & machines
-  Data centers & Networks
-  Non-residential Buildings
-  Residential Buildings

**We make energy safer, more reliable,
more efficient, more productive.**

The future is electric:

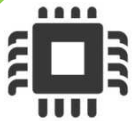

-  Residential Buildings
Confort & Security
Accurate control
-  Electric Vehicle
Carbon reduction
Healthy environment
-  Industry
Automation
Competitiveness
-  Data centers
Reliability
Efficiency

Life Is On

Schneider
Electric

Open Innovation - Key topics

ACTIVE ELECTRONICS

- Embedded intelligence
- Power electronics
- Energy harvesting
- Energy storage

IoT / CONNECTED MACHINES

- Wireless connectivity
- Smart sensors
- Geo-localization
- Low energy

OPERATIONAL INTELLIGENCE

- Software & OS
- Big data & Analytics
- Cyber-security
- Virtualization

SMART USER EXPERIENCE

- HMI / Displays
- Smart apps
- Augmented reality
- Surfaces & colors

CORE ELECTRICAL FUNCTIONS

- Green materials
- Smart materials
- Performance materials
- Power connections

SUPPLY CHAIN & INDUSTRY 4.0

- Additive manufacturing
- Traceability
- Asset management
